#### Martin Scharl – self-employed carpenter

“I am a self-employed carpenter and work in tough conditions sometimes. I often need to kneel down suddenly and get up again just as quickly. Sharp pieces of wood and concrete edges are part of everyday life for me, so my trousers need to be very durable and wear-resistant. Previously, my trousers had holes and rips in them very quickly. I can really recommend the e.s.roughTough to all craftsmen and women: they are single-handedly the most durable trousers I have ever had, and they also look really good, too. The triple seams are as solid as if they were welded. The heavy weight of the trousers is also ideal! I really feel like I have something solid on and I feel safe and protected.”
